**Data Analyst:** https://hub.lifescale.cz/certificate/02b3f8cc-d64e-4cfc-8785-b21193f3b64f

**GA4:** https://skillshop.credential.net/69782810-a75e-43da-91b2-b122f56f79b4#acc.z6ufJ5QF

## Introduction

Strong analytical thinking: experience working with data, and the ability to read and understand both technical and software code.

## Experience

07/2026 - until now

**Interpreter**

Bernex Bimetall s.r.o.

- Interpreting during the training of a foreign worker in an engineering company.
- Gained experience with PUMA V550 and PUMA V600 lathes.
- Oriented in ISO code

07/2026 - until now

**Data Analyst**

luxusnipradlo.cz

- Migration of GA4 analytics to BigQuery using Python.
- Visualization of dashboards in Looker Studio (Data Studio).

02/2023 - 11/2025

**UX Designer & Data Analyst**

IDEA StatiCa

- Analysis of visitor behavior in GA4.
- Testing and verification: conducting user tests, analyzing error states, and proposing corrective solutions.
- Collaboration with developers: defining requirements for desktop (WPF, XAML) and web (React) applications.
- Management of documentation and system components to ensure cross-platform consistency.

07/2021 - 12/2022

**UX/UI Designer & Researcher**

Kentico

- Research and analysis: conducting qualitative data collection, analyzing user needs, and defining development requirements

- Testing: preparing test scenarios, executing testing, and evaluating results to eliminate deficiencies.
- Specification creation: generating detailed descriptions of workflows and interactions for the development team.

12/2018 - 07/2021

**UX Designer**
Konica Minolta
- Process analysis in operations: shadowing production line operators, bottleneck identification, and error rate analysis.
-Solution design: creating wireframes and prototypes based on gathered data and requirements.
- Collaboration on updating the design system and technical guidelines

01/2018 - 12/2018

**UX Developer**
Spud NOW
- Front-end development: refactoring of HTML and CSS (SASS) architecture – practical code modifications.
- Bug fixing: analysis and resolution of errors in the user interface layer within the application.
- Preparation of technical documents and mockups: for the enhancement of the existing solution.

01/2010 - 11/2018

**HTML/CSS kodér**
FNZ
- Implementation: creation of responsive designs using HTML and CSS (source code knowledge).
- Implementation: creation of responsive designs using HTML and CSS (source code knowledge).

## Knowledge and skills

Languages:

English (proficient) German (pre-intermediate)

Skills:

Google Analytics 4 BigQuery Data Studio Python Django Excel SQL Google Stitch orchestrace AI agentů Google Tableau

Driving licenses:

B | Active driver

## Education

Level of education **University**

2007 - 2011

**Mendel university in Brno**
Economic informatics
Economic informatics is an interdisciplinary field that combines economics, business administration, computer science, and data analysis to design, build, and manage information and communication technology (ICT) systems for organizations.

## Certificates and trainings

2026

**Data Analyst**
Coders Lab
Excel, Python, SQL, Data Visualization, Tableau
